AN IOWA MAN'S OPISION OF RICH-

, am spoudence Kenkuk Gate City Hore, then, is the grand objective point of the late unpleasantiess. Here s the city which was struck at repeat edly from the early spring of 1862 till the early spring of 18th, and no voluer able point found until the laster date The tide of battle raged as close as five miles to its boundary, and surged as far north of it as Pennsylvama two hun dred miles us the crow flies. But whether fighting in Maryland to day, or in Penn sylvania ten months after, the grand object of McClellan's Burnside's Meade s, Hooker's orthrant's ittack was Richmond, and the grand object of Richmond, and the grand object of Johnston's, Jackson's on Lee's defense was the same city. Truly a remarkable place, and one worth seeing and I must confess, it struck me as being a city that was, to put it very middly, exceedingly the worse for wear. Following the current of people, I walked down. Broad street on my way to the State Broad street on my way to the State Capitol, and notice that the side streetare narrow and mean. Even Broad street, one of Richmond's main thoroughtares, does not look so well by a great deal as Main street in your city. All the way along the journey, and now that you are in the city, you cannot but notice how different everything looks from what you are accustomed to see in a northern or western town even of one quarter the size and population I am strongly of the opinion that Rich mond would be creatly benefited by a second capture at the hands of the Yanker this time with Yankre thrift, industry, and enterprise, instead of bul-SHRTS. industry, and enterprise, instead of but lets and bayonets. Virginia too would be better for an invariou of the same sort, and would not be waking up now and then to find the State Auditor complaining that there was only six dollars in the State treasury But to return to

> raifroad station you at length reach the Capitol Square, within which stands the building, which gives it (the square) its name. The Capitol stands on the brow of one of the seven hills (I think it is seven) on which Richmond is built. It is old fashioned in the Greek temple sort of style, plan and simple in its exterior. The State flag flow at one end of the building, and the Stars and Stripes at the other, and I think, nay, am posrive that it was the only United States flag I saw in the whole city though the day was the Fourth of July, and me thinks that Virginia could afford to honor the old flag which that day give hirth to, a little. I noticed an entire absence of anything that looked like the ghost of a celebration on the part of the white people there and have my own private opinion as to their love for the flag and the Union it is emblementical

MALDEN JONEY wants the endorse ment of the Greenbackers, but when he attended the State Convention of that party at Springfield he refused to voto when called on, and, according to the would have been utterly unattainable story of a leading greenbacker, gave as a reason for not voting that there were too many Democrats watching him. It seems from what has occurred since then that the greenbackers were watching him, too

It says that the last Congress should have taken steps to give the South a railroad to the Pacific (leesn, and made appropriations "for the reclamation of the valley of the great river that drains three fourths of the States of the Union," and it completes a list of other grievances that is quite formidable to read with the thermometer at 90 degrees in the shade. --The Herald says that the demand of the South has been answered by a unajority of the Northern Democrats "with anub" and it even confesses that, while "the governing element of the South has bitterly fought the Republican par thatever party, have a common interest ty, there were enough liberal-minded Republicans favorable to the measures alfuded to to have passed them if the Democrats had only stood up to the rick.
